

The BML W5 provides a wide variety of reports that enable users to leverage the information contained within BML business models to identify opportunities for business improvement and automatically generate accurate and concise business requirements.

BML User Manual Report

The BML User Manual Report provides an outline of the steps needed to be performed for a specific set of activities. The report is generated based on activities and profiles contained in the BML WHAT model. The completed report lists the Actors, Systems, Data Controls, Time Constraints, and Issues/Gaps for all of the children for a given parent activity. Additionally, the report lists the level two activities and descriptions, who is responsible for each level two activity, and then lists all of the child activities and descriptions.

The BML User Manual Report is generated based on the information sources- BML files and models- selected by the user and can be output in one of several formats, including a Microsoft Word document (.doc), or Web page (.html, .htm).

The BML User Manual Report is offered as an add-on to BML W5 and is a standalone license.

The table below summarizes the required profiles and attributes needed to generate the report.

Profile Name	Attribute Name	Valid Values
Accountability		
	Actor Name	
	Actor Type	org, role, system
	RACI	Responsible, Accountable, Consulted, Informed
