

## SAP® SOLUTION MANAGER CONNECTOR

The SAP® Solution Manager Connector provides the ability to export information contained within BML WHAT models to the SAP® Solution Manager application. BML WHAT Activities, contained within BML HOW models, are sent to SAP® Solution Manager as a Project with associated Scenarios, Processes, Process Steps, and Transactions. After the data has been transferred a Cross Reference Table can be generated that maps the BML WHAT Activity that contains the SAP® Transaction Code to the associated Scenario, Process, and Process Step.

The export is generated based on the information sources- BML files and models- selected by the user and is offered as an add-on to BML W5 and is a standalone license.

### SAP® CROSS REFERENCE TABLE

*The following uses sample data and is for demonstration purposes only.*

SAP® Scenario	SAP® Process	SAP® Process Step	BML Activity #	BML Activity Name
Procure to Pay	Perform Virtual Product Goods Issue (S)	Receive Virtual Product Demand	4.8.1.1	Receive Stock Transport PO for Virtual Product
Procure to Pay	Perform Virtual Product Goods Issue (S)	Receive Virtual Product Demand	4.8.1.2	Receive Sales Order for Virtual Product

### HARDWARE & SOFTWARE REQUIREMENTS
